BSW SUPPLEMENTARY EXAMINATIONS
SW3307: RISK AND RESILIENCE FACTORS

AUGUST, 2023 MARKS: 75 Time: 2 HRS: 30 Minutes

INSTRUCTIONS: ANSWER ANY **THREE** QUESTIONS
EACH QUESTION CARRIES **25** MARKS

1. An Ecomap is an assessment tool used by Social Workers to assess the presence and adequacy of resources and support systems available to the client.
As the Social Worker in child welfare services, provide a list of at least **FIVE** stakeholders you would consider when developing an Ecomap for a 9 year old girl who lost both parents due to the Covid-19 related illness.
2. Using examples, demonstrate how Social Workers can enhance resilience from a strengths-based social work perspective.
3. Outline and discuss **FOUR** principles of the ecological model of resilience as proposed by Ungar (2012).
4. Critically discuss the **FOUR** waves of resilience theory.
5. Using any Resilience model of your choice, illustrate your intervention as the Social Worker in a community with escalated cases of alcohol and substance abuse among adolescents.
